

2026.02.24 - Daily Summary

2026.02.24 - Daily Summary

Summary

- **Start Time:** 7:04:58 AM
 - **Stop Time:** 4:54:32 PM
 - **Total Hours:** 9h 49m 34s
-

Morning

7:04 AM – 7:17 AM | Development Startup The day began with a brief TimeCard entry, followed by immediate coding activity. Short bursts of Source Control, Communications, and Research punctuated the early minutes as the work environment was set up for the day.

7:17 AM – 9:00 AM | Extended Coding Sessions Two significant uninterrupted coding blocks dominated this period — approximately 57 minutes from 7:17 AM and then another 42 minutes starting around 8:18 AM. Research lookups in TimeCard were performed briefly between these sessions.

9:00 AM – 9:11 AM | Communications & Research A cluster of brief Communications entries occurred just after 9:00 AM, followed by a Research/TimeCard review at 9:08 AM.

9:11 AM – 10:40 AM | Coding, Testing & Research Cycles Active development continued with alternating cycles of Coding and Testing. Research and TimeCard check-ins occurred at regular intervals. Communications appeared at several points. Key coding runs included a 6m 57s block at 9:12 AM, an 8m 43s block at 9:28 AM, and a 10m 57s block at 10:18 AM. Testing activity was frequent throughout this period.

10:40 AM – 11:22 AM | Break / Gap in Entries No time entries were recorded between approximately 10:40 AM and 11:22 AM.

11:22 AM – 12:07 PM | Late Morning Coding & Research Activity resumed with a TimeCard entry and Communications, followed by coding, Research, and another extended coding block of 29m 22s carrying through to 12:07 PM.

Afternoon

12:07 PM – 12:57 PM | Source Control, Testing & Issue Tracking After a short gap, Source Control work began at 12:09 PM. Communications entries appeared at 12:17 PM and 12:19 PM. Additional Source Control commits followed at 12:26 and 12:28 PM. Issue Tracking was visited briefly. Testing cycles were active from 12:33 PM onward, interspersed with Research and Communications. A Database activity appeared at 12:54 PM.

12:57 PM – 1:43 PM | Coding & Testing Deep Work A sustained sequence of Coding and Testing entries ran through this period. Notable blocks include 7m 06s coding at 12:58 PM, 16m 13s coding at 1:07 PM, Source Control commits at 1:30 PM, and TimeCard administration at 1:35 PM and 1:39 PM.

1:43 PM – 2:15 PM | Coding, Source Control & Communications Active coding resumed after TimeCard entries. A Database entry appeared briefly at 1:44 PM. Coding continued in 5–8 minute segments, with Source Control commits at 1:58 PM, 2:00 PM, 2:09 PM, and 2:12 PM. Communications appeared at 2:11 PM.

2:15 PM – 3:09 PM | Coding, Research & Extended Communications Coding continued with blocks of 4m 15s, 3m 09s, 10m 14s, and others. Issue Tracking was briefly visited at 2:19 PM. A significant 6m 52s Communications session occurred at 2:43 PM, followed by further coding and more Communications entries through 3:09 PM.

Evening

3:09 PM – 3:53 PM | Testing & Extended Communications A substantial Communications-heavy period began, interspersed with Testing cycles. Multiple Communications blocks ranged from 1–5 minutes each. Testing appeared repeatedly between 3:09 PM and 3:53 PM. Research and TimeCard lookups occurred at 3:28, 3:38, 3:40, 3:49, 3:50, and 3:53 PM. A brief Source Control entry appeared at 3:53 PM. A Database entry occurred at 3:48 PM.

3:53 PM – 4:07 PM | Testing & Research Testing activity continued with entries through 3:56 PM. Research occupied significant time from 3:56 PM to 4:07 PM, with several general "Development" entries mixed in.

4:07 PM – 4:54 PM | Research Deep Dive & Final Coding An extensive Research phase ran from 4:07 PM to approximately 4:49 PM, with TimeCard entries running in parallel throughout. Coding returned at 4:13 PM, 4:15 PM, 4:41 PM, 4:44 PM, 4:49 PM, and 4:54 PM. A final Communications entry appeared at 4:53 PM before the last coding entry ended the day at 4:54:32 PM.

Summary Of Application Use

Application	Activities	Time Spent
Coding	Active software development across the full day; extended uninterrupted blocks in the morning and afternoon, plus shorter iterative sessions interspersed with testing	5h 19m 54s
TimeCard	Time tracking and administrative timecard updates throughout the day	1h 12m 02s
Research	Looking up reference material, documentation, and technical information in support of development tasks	1h 04m 22s
Communications	Messaging and communication activity, including several extended conversations in the mid-to-late afternoon	0h 51m 45s
Testing	Running and reviewing tests, verifying code behavior across multiple cycles throughout the day	0h 43m 52s
Development (General)	General development environment activity not categorized under a specific sub-type	0h 18m 16s
Source Control	Committing code, managing branches, and performing version control operations	0h 12m 51s
Database	Brief database-related activity	0h 01m 42s
Issue Tracking	Reviewing or updating issue tracking items	0h 01m 17s
Login	System login events	0h 00m 28s
