

2026.02.17 - Daily Summary

2026.02.17 - Daily Summary

Summary

Start Time 7:33 AM

Stop Time 5:15 AM

Total Hours ~9 hrs 42 min (active)

Morning (7:33 AM – 11:59 AM)

The day began with a quick review of the VCS database in **Navicat Premium**, checking the `Project` and `ProjectCustomDataUpdateLog` tables. Work quickly shifted to heavy development in **Microsoft Visual Studio Insiders**, focused on the Kelly.Revit project. The primary files worked on during this period included:

- **ElementControl.xaml / .cs** — Extended UI work including layout, refactoring, and code-behind logic. A significant 8+ minute block of focused work occurred around 8:58–9:06 AM.
- **ModuleManageView.xaml / ModuleManageViewModel.cs** — Ongoing MVVM work; the `ModuleManageViewModel` saw several focused editing sessions including a nearly 6-minute block around 9:47–9:53 AM.
- **ViewModel.cs / ViewModel.cs** — Interface and base class updates, including ReSharper-assisted encapsulation and generation.
- **ScopeSelector.xaml.cs** — Rename refactoring and logic updates.
- **Module.cs** — New or updated module model logic, with ~3 minutes of editing.
- Multiple other ViewModels updated for interface compliance:
 - `SuspendedSupportManagerViewModel`,
 - `LayoutPointToCommaSeparatedValueFileExportViewModel`,
 - `LayoutPointFromCommaSeparatedValueImportViewModel`, `ModuleCreatorViewModel`,
 - `SpoolManageViewModel`, `CategoryExportToSqlServerViewModel`,
 - `FabricationPartDataExporterViewModel`, `ServiceColorViewModel`,
 - `DocumentInformationManageViewModel`, `ApplicationAboutViewModel`,
 - `ViciousInstanceLevelAssignViewModel`.

Microsoft Teams was active throughout — primarily in the **Kelly Tools** channel — for team coordination and release discussions. **Copilot (M365)** was consulted via Edge on a few

occasions. **GitKraken Desktop** was used for source control commits/reviews. **Snagit** was used to capture screenshots.

Later in the morning, work expanded to **Kelly.Revit.Logic** in **JetBrains Rider**, with significant time on `CoordinateExtensions.cs` — including a 9.5-minute deep work block from 11:49 AM to 11:59 AM.

Autodesk Revit 2023.1 and **Revit 2025.4** were both launched and used for live testing. **InstallShield** was used to work on the installer package. NuGet package management was also reviewed.

Afternoon (12:55 PM – 5:15 PM)

After a break, work resumed around 12:55 PM. The afternoon opened with a visit to **ChatGPT** and **Claude** via Edge, and use of **Notepad++** to manage an AI prompt file (`To Professional Message.txt`), suggesting some AI-assisted message drafting.

Development work resumed heavily in **JetBrains Rider** and **Visual Studio Insiders**:

- **DocumentExtensions.cs (Kelly.Revit.Logic)** — This was the dominant file of the afternoon, with multiple extended sessions totaling well over an hour of focused coding. Sessions ranged from 2 to 14+ minutes of continuous work. This file appears to have been the core focus of the afternoon's development effort.
- **FamilyInstanceExtensions.cs** — Worked alongside `DocumentExtensions`, with multiple short sessions.
- **ViewExtensions.cs** — Updated in the early afternoon alongside Navicat database review (`ExternalParameterDefinitions` table).
- **LineNumberDocumentCache.cs** — Active debugging sessions in Revit 2023.1, with multiple debug/run cycles examining `FamilyInstance` objects.
- **DocumentSession.cs** — Minor edits.
- **ElementFilterTools.cs** — Updated, with ~4 minutes of editing.
- **Various Cache files** — `DetailingPackageDocumentCache` , `ModuleNumberDocumentCache` , `SpoolNumberDocumentCache` , `SystemDocumentCache` , `ServiceDocumentCache` all reviewed/updated.
- **Command files updated in batch:** `FabricationCustomDataReportCommand` , `FabricationPartVariousReportFileExportCommand` , `FabricationPartDimensionLogCommand` , `ServiceFillColorViewFilterCommand` , `ServiceLineColorViewFilterCommand` , `SystemFillColorViewFilterCommand` , `DetailingPackageAssignerValueResetCommand` , `LineNumberAssignerValueResetCommand` , `DuctItemNumberResetCommand` ,

PipeAlignBottomCommand , UnusedFamilyTypeDeleteCommand ,
AllUnusedInProjectDeleteViewFilterCommand , ViewOpenCommand ,
SpoolSheetOpenCommand , ArrangeDistributeTagsAroundCommand ,
PurgeKellySharedParameterElementsCommand , CustomDataUpdaterCommand ,
AutoUpdater .

- **SpoolCreateViewModel / ViciousFileBasedSystemPipePlaceView.xaml.cs / ViciousFileBasedSystemPipePlaceTools.cs** — Updated as part of broader ViewModel and tool refactoring.

Autodesk Revit (both 2023.1 and via IDE run sessions) was used repeatedly for live testing and debugging, including use of **Ideate Explorer** for element inspection. **GitKraken** was used for commits. **M365 Copilot** was consulted several times. **Teams** activity continued in the Kelly Tools and Version Release Discussion channels.

Evening

No activity recorded after 5:15 PM.

Summary by Focus Area

Focus Area	Primary Files / Tools	Est. Time
ViewModel / MVVM Refactoring	ElementControl, ModuleManageView/ViewModel, IViewModel, ViewModel, SpoolCreateViewModel, and ~12 other ViewModels	~2.5 hrs
DocumentExtensions Development	DocumentExtensions.cs (Kelly.Revit.Logic)	~2.0 hrs
Line Number / Cache System	LineNumberDocumentCache, ModuleNumberDocumentCache, SpoolNumberDocumentCache, etc.	~1.0 hr
Command File Updates (Batch)	~15+ command files	~0.75 hr
Live Testing / Debugging	Autodesk Revit 2023.1 & 2025.4	~0.75 hr
Team Communication	Microsoft Teams (Kelly Tools, Release Discussion)	~0.5 hr
Source Control	GitKraken Desktop	~0.25 hr

Focus Area	Primary Files / Tools	Est. Time
AI / Research	Claude, ChatGPT, M365 Copilot, Edge	~0.25 hr
Database Review	Navicat Premium (VCS database)	~0.1 hr
Other (Snagit, Installer, etc.)	InstallShield, Snagit, Notepad++	~0.1 hr
