2026.02.20 - Daily Summary

Summary

- **Start Time:** 6:15 AM
 - **Stop Time:** 4:08 PM
 - **Total Hours:** ~9 hrs 53 min
-

Morning (6:15 AM – 11:59 AM)

6:15 AM – 7:00 AM | Early Dev: Kelly.Revit.Logic Code Review & Git Setup

The day kicked off in GitKraken and JetBrains Rider reviewing and editing core extension files in the `Kelly.Revit.Logic` library. Files touched include `ElementDataExtensions.cs`, `CableTrayExtensions.cs`, `ConduitExtensions.cs`, `DuctExtensions.cs`, `FabricationPartExtensions.cs`, `FamilyInstanceExtensions.cs`, `FamilySymbolExtensions.cs`, `PipeExtensions.cs`, `Names.cs`, and `ProjectInformationEntity.cs`. Brief Outlook and browser activity reviewed timecards and internal KellyNet/Linear pages. A commit was made to `CableTrayExtensions.cs` and pushed to `Kelly-Revit-Logic` after resolving a Git user name config issue.

7:00 AM – 8:15 AM | Visual Studio: ComponentElementDataModel & Refactoring

Extensive work in Visual Studio Insiders on `ComponentElementDataModel.cs`, `BillOfMaterialTypeDefaultElementDataModel.cs`, `ProductElementDataModel.cs`, and many service files (`FabricationPartInstancesUpdaterElementService.cs`, `ContentIdentityUpdaterElementService.cs`, `ElevationElementService.cs`, etc.). ReSharper Cleanup Code ran on multiple passes. Notepad++ used for text manipulation. Work on `PipeAlignBottomCommand.cs`, `ConduitAlignBottomCommand.cs`, `SizeElementDataModel.cs`, and related files. GitKraken used to review and push PRs.

8:15 AM – 9:10 AM | AI-Assisted Daily Summary Workflow Setup

Switched to Claude (claude.ai) and ChatGPT to develop a daily work summary process. Explored ManicTime export, Typora for markdown rendering, Obsidian for release notes, and

File Explorer to set up a `Daily Summaries` folder. Reviewed and refined the `AI Instructions.md` template file. Saved output files including `2026-02-18 Daily Summary.md`, `2026.02.16 - Daily Summary.md`, and `2026.02.18 - Daily Summary.md`.

9:10 AM – 11:00 AM | ElementDataExtensions.cs Deep Dive + Team Comms

Continued heavy editing of `ElementDataExtensions.cs` in both Rider and Visual Studio. Checked Teams channels: Dev Team, Code Review, Craig Smith, Kelly Tools. Snagit used for screenshots. Browsed Linear for Cycle 90 issues. Worked on Stratus view support. Committed and pushed multiple PRs (#5, #6, #7, #8, #9) to `Kelly-Revit-Logic`. Cleaned up `CableTrayExtensions.cs`. PR checks monitored via GitHub Agents. Brief Outlook inbox review and email responses.

11:00 AM – 11:59 AM | Revit Testing: SpoolManage & DocumentExtensions

Loaded Revit 2023.1 and 2025.4 for live testing. Debugged `SpoolManageViewModel.cs` and `SuspendedSupport.cs` with Revit running. Worked on `DocumentExtensions.cs` and `BuiltInParameterExtensions.cs` — refactoring parameter lookups and family symbol logic. Teams communication with Landon Turley and Dev Team. Multiple Revit model loads/syncs. Snagit screenshots captured for documentation.

Afternoon (12:00 PM – 4:08 PM)

12:00 PM – 1:10 PM | Revit Debugging: Spool Manager + Suspended Support

Continued active debugging of `SpoolManageViewModel.cs` and `SuspendedSupport.cs`. Traced family symbol collections (111 family symbols in Revit test model). Explored Pendent Support Tagger in live Revit session. Investigated `BuiltInParameterExtensions.cs` further. ReSharper Code Cleanup applied. Email review (Sent Items, Outlook).

1:10 PM – 2:15 PM | Trapeze Member Commands + BOM Workflow

Debugged and refined `TrapezeVerticalMemberExtendPushButtonEnabler.cs` and `TrapezeVerticalMemberResetPushButtonEnabler.cs`. Multiple Revit load/debug cycles. Worked on `DocumentExtensions.cs` for family instance filtering. BOM (`BillofMaterialAssignCommand.cs`) tested in Revit — debugged element data model queries. `WeldLocationSetCommand.cs` and related weld commands updated. Brief Google News browsing (MotoGP, F1).

2:15 PM – 3:10 PM | Release Packaging, Code Signing & Installer Work

Tested full BOM and Layout Point workflows in Revit 2023.1 and 2025.4. GitKraken commit for PR #10 (Kelly-Revit-Logic). Launched InstallShield for Kelly-Tools-For-Revit installer. Investigated Sectigo code signing certificate setup (SafeNet USB token video). Ran Glary Utilities Uninstall Manager. Copied plugin builds to release directories. Teams channels: Kelly Tools, Version Release Discussion.

3:10 PM – 4:08 PM | Namespace Refactoring + Repository Restructure

Refactored Kelly.Windows.Data and Kelly.Windows.Logic projects (renamed from Kelly.Data / Kelly.Logic). Updated Assembly.Build.props , GlobalUsings.cs , project files, and many domain model files. Created PRs #21 (rename Data project) and #25 (rename Logic project). Renamed and updated GitHub repositories under jhkweb org. GitKraken used extensively for commit/push/PR management. Notepad++ used to edit .git/config files directly. Transitioned daily summary workflow from ChatGPT to Claude using updated AI Instructions.md .

Evening

No activity recorded after 4:08 PM.

Summary by Focus Area

Focus Area	Primary Files / Tools	Est. Time
Kelly.Revit.Logic – Core Extensions	ElementDataExtensions.cs , CableTrayExtensions.cs , ConduitExtensions.cs , PipeExtensions.cs , FamilySymbolExtensions.cs , etc.	~2.5 hrs
Kelly.Revit – UI & Commands	ComponentElementDataModel.cs , SpoolManageViewModel.cs , BillOfMaterialAssignCommand.cs , WeldLocationSetCommand.cs , TrapezeVerticalMember*.cs , SuspendedSupport.cs	~2.5 hrs
Git / Source Control	GitKraken, GitHub (PRs #5–#11, #19–#25), Push/commit cycles	~1.0 hr

Focus Area	Primary Files / Tools	Est. Time
Revit Live Testing	Autodesk Revit 2023.1, 2025.4, model open/sync/debug sessions	~1.0 hr
Repository Restructuring	Kelly.Windows.Data, Kelly.Windows.Logic rename, Assembly.Build.props , namespace updates	~1.0 hr
Daily Summary & AI Tooling	Claude, ChatGPT, ManicTime, Typora, AI Instructions workflow	~0.75 hr
Communication & Email	Outlook, Microsoft Teams (Dev Team, Kelly Tools, Craig Smith, Landon Turley)	~0.75 hr
Installer / Packaging	InstallShield, Sectigo code signing research, release folder management	~0.5 hr

Report generated by Claude Sonnet 4.6 (Anthropic) using ManicTime activity data exported by the user.
